
Organic Nano Electronic (ONE=I) Materials for those who understand quality

1-Material stands for Organic Nano Electronic (ONE = 1) Material. 1-Material Inc to date is focusing on the developing and supplying of ONE materials at the research level. Our goal is to provide the reproducible and standardized ONE materials to research society such that those undertaking research in the field(OPV, OTFT, OLED, OTE, and printing electronics in general) are able to develop the technology free from the usual concerns of availability and reproducibility. ONE business is built on and rewarded by global ONE research society, and we are proud of constantly sponsoring ONE events worldwide. Coming soon are:

(1)

August 7-9, 2018, Ottawa, Canada.

<http://2018.ieee-ifetc.org/>

(2) **PMSE: Synthesis, Processing & Device Engineering of Polymeric Electronic Materials.**

ACS Meeting, August 20-23, 2018. Boston, USA

<https://plan.core-apps.com/acsboston18/event/ae34cf48e66228669bb62a32bd67ef91>

(3) **Australasian Community for Advanced Organic Semiconductors (AUCAOS)**

Symposium 2018, December 3-5, 2018. Hahndorf, South Australia.
